

Whatever the threat,
we're your best line
of defense.

SAST SOLUTIONS: Software Suite, Consulting and
Managed Services for your SAP Security & Compliance.

What's protecting you from cyber attacks?

Every second company worldwide has been the victim of at least one significant IT security incident. SAP systems are increasingly targeted in such attacks. The growing complexity of system environments and the usual limited security experience of many employees often leaves serious security gaps. Ignorance and panic will not help here, but securing your SAP system properly certainly will.

AKQUINET provides perfect solutions for you. We specialize in holistic security for SAP environments and our multifaceted service spectrum is waiting for you to make us your capable IT security partner. In addition to our proprietary software, our SAST SOLUTIONS also offer all-around protection for your SAP ERP and S/4HANA systems includes consulting experts and managed services.

"In 94% of our security reviews, we were able to successfully gain access to the systems in less than one hour, and none of our attempts were recognized by monitoring systems."

Ralf Kempf, CTO SAST SOLUTIONS.

Your IT security is our number one concern – in real time.

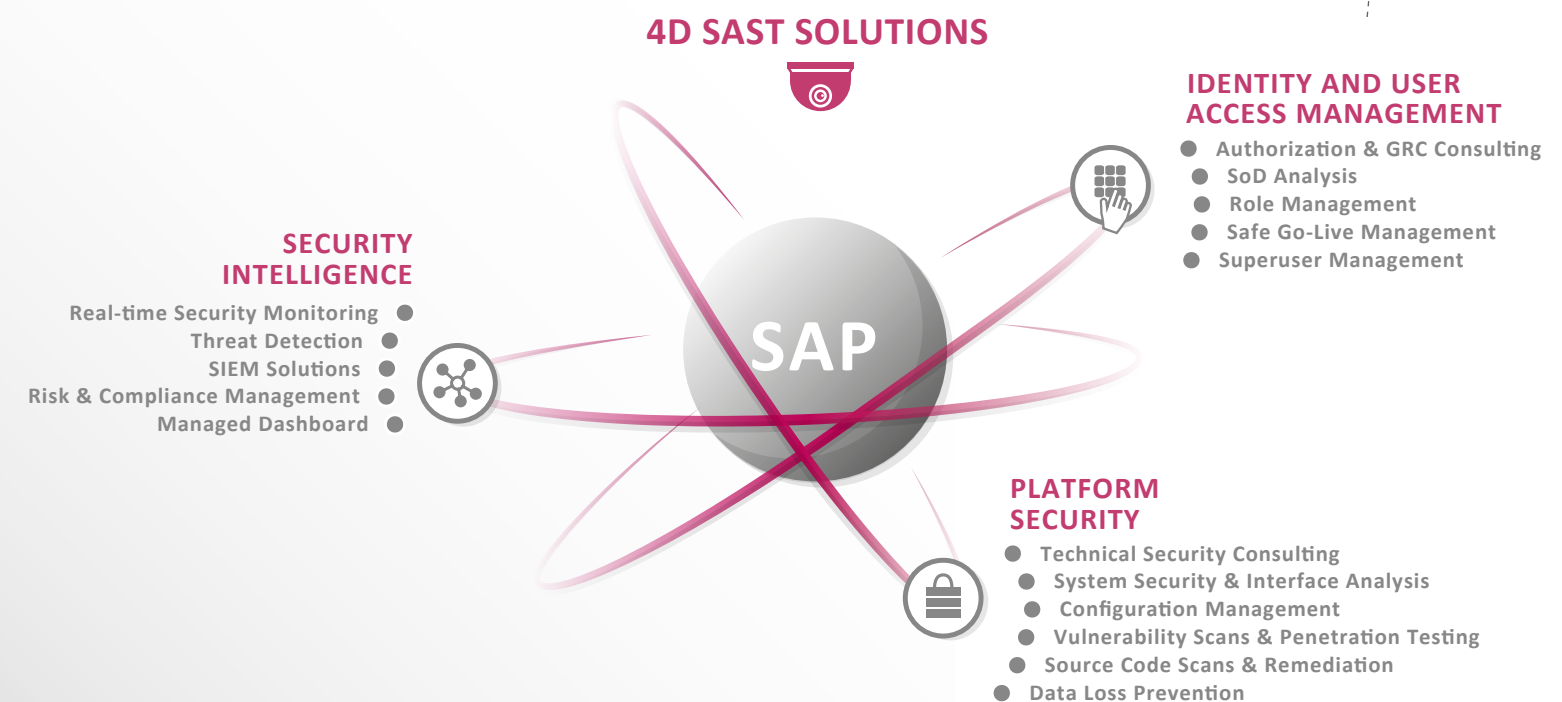

There are countless possibilities for attacking SAP systems, both inside and out. But we know just as many ways to protect these systems. We call it "4D SAST SOLUTIONS". This package provides all-around protection for your SAP system with real-time monitoring.

Our SAST SUITE supports your governance, risk and compliance (GRC) strategies, from assessing risk to securing your SAP ERP and S/4HANA systems, down to identity and user access management.

That is not all! On top of that, you can book all of the options mentioned above as managed services. This means letting us handle constantly assessing and monitoring your SAP landscape for any system vulnerabilities, critical authorizations and access violation.

No matter what you decide, we're your best line of defense.

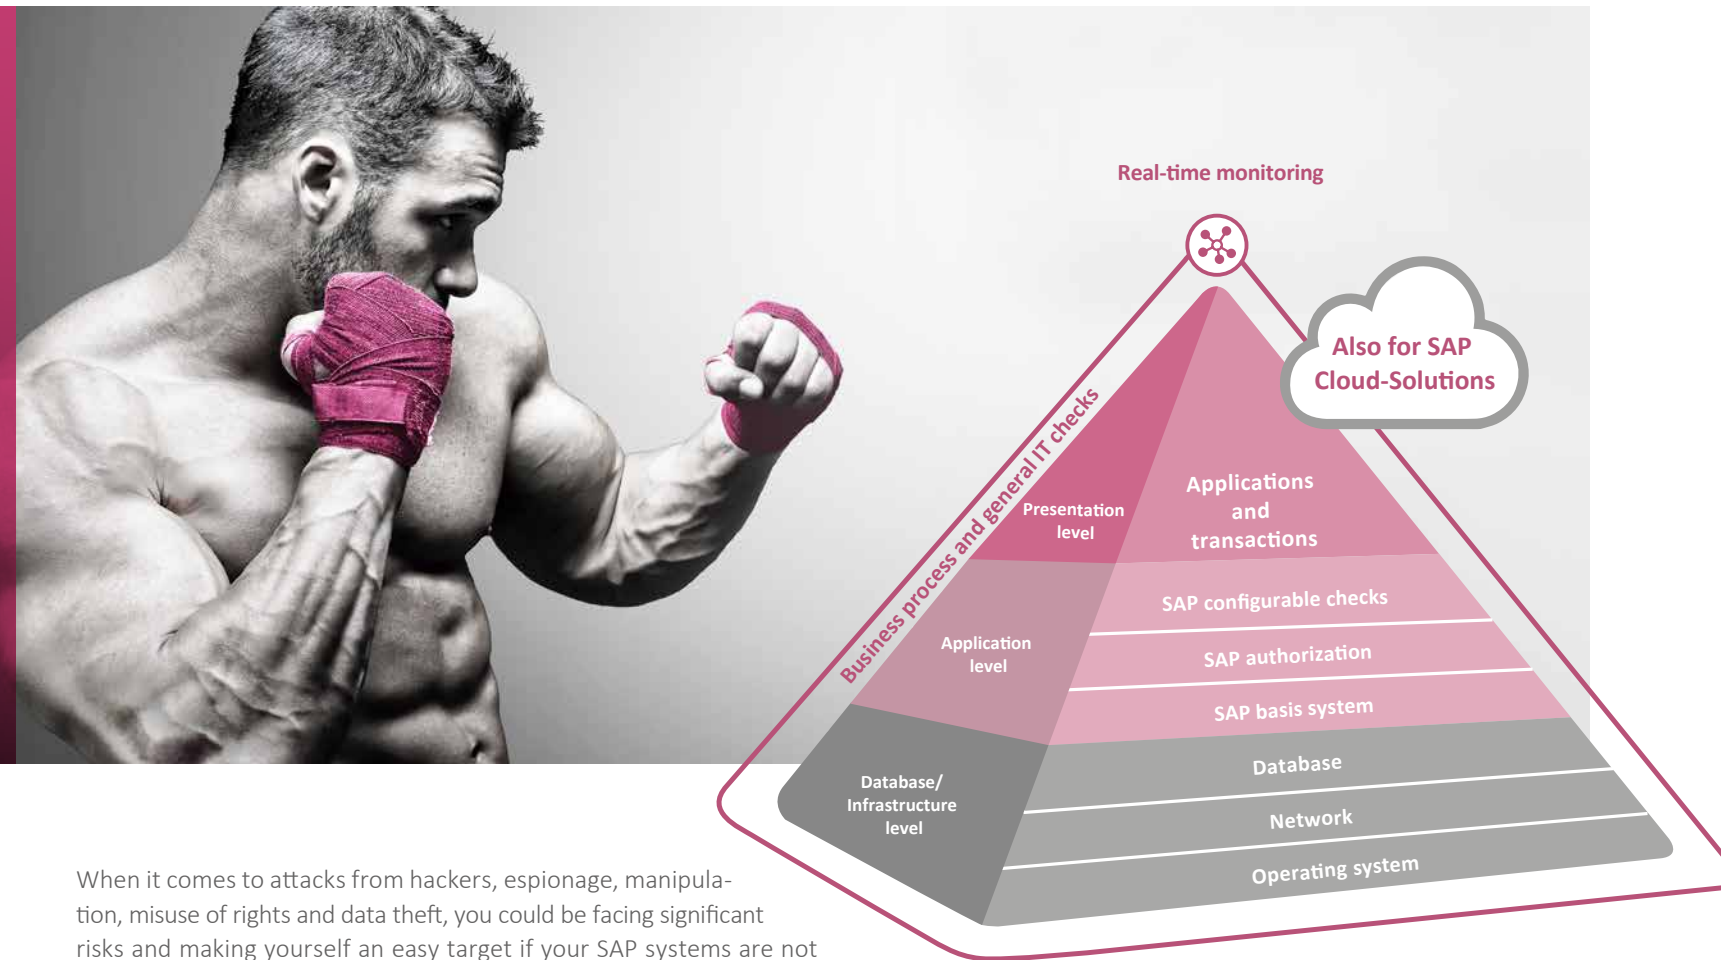

All solutions from one source.

Stay protected on all levels.

Keep your guard up.

SAST SUITE

When it comes to attacks from hackers, espionage, manipulation, misuse of rights and data theft, you could be facing significant risks and making yourself an easy target if your SAP systems are not protected at every level.

A STRONG FOUNDATION BUILT ON PLATFORM SECURITY

Use SAST SUITE to put your SAP ERP and S/4HANA, infrastructure, databases and custom ABAP development to the test and analyze your system interfaces.

SYSTEMATIC AUTHORIZATION MANAGEMENT

SAST SUITE allows you to set up automatic role management, eliminate conflicts from the segregation of duties and, as a result, better control the access rights of all users – including privileged users. Our software can also self-adjusts your authorizations and slimming them down significantly, without restricting your day-to-day business.

REAL-TIME RISK MANAGEMENT

Constant 360-degree detection rounds out your SAP ERP and S/4HANA security. Our intelligent monitoring solutions, such as the Management Dashboard, mean you always have an overview of the current SAP security status, identify critical incidents and can take counter-measures right away.

+ What makes the SAST SUITE unique:

- SAP security and compliance for your SAP ERP and S/4HANA systems in real time
- More than 4,000 automated tests and security notes for a comprehensive system check
- 25 predefined authorization testing rules with more than 800 conflict-free role templates
- Takes into account recommendations from SAP, German SAP User Group (DSAG) and the German Federal Office for Information Security (BSI)
- Complete logging of unwanted downloads from your systems
- Protect sensitive personal data by logging the read accesses in the SAP HCM environment
- Reports with well-defined recommendations for action
- Certified for SAP NetWeaver, HANA and S/4HANA

+ Numerous advantages for you:

- Ready to run in just a few hours
- No additional hardware or software necessary – the SAST SUITE is installed as an SAP add-on
- Intuitive operation reduces the learning curve for your employees
- The high level of automation and pre-configuration conserve your internal resources
- One-click overview of your current risk and compliance status
- Optionally integrate your specific security and compliance policies
- Easy integration of your SIEM or IdM tool status
- The SAST SUITE is available in nine languages and used worldwide

For your company's digital future.

We'll bring your SAP security up to speed.

In our experience, in far too many cases, the way companies neglect the security of their SAP system is borderline reckless. It's rare that we come across cases where the infrastructure has been properly hardened and effective authorization management is an everyday priority. That's why most threats are identified far too late.

Our SAP security and compliance experts have an outstanding level of proficiency when it comes to safeguarding your SAP ERP and S/4HANA landscapes in real time. They know how to protect you against every kind of incursion, including hacks, espionage, manipulation, rights violations, or data theft.

What makes us truly unique, however, is how we combine our very own SAST SUITE software with a series of best practices.

SAP SECURITY CONSULTING

To assess the risk exposure of your SAP landscape, we identify all the potential attack vectors – from your infrastructure, the parameters and settings of your SAP systems, to the check of your source code.

On request, we can also aid you in eliminating all the vulnerabilities we find and advise you on securing your systems for the long term.

And if your company's migration to SAP HANA is right around the corner, our SAP security experts are the ideal partner for safeguarding your systems and ensuring all the necessary security settings before you start your transition.

SAP AUTHORIZATION CONSULTING

We can help you start over from scratch in authorization management or redesign your established concepts for optimal clarity. Our project models allow for a high degree of flexibility and they are tailored to your particular requirements.

For this we implement our proven SAST SUITE for all authorization projects and can optimize automation to shorten project runtime by up to 70%, going easy on your project budget in the process.

Thanks to our "Safe Go Live" approach or our self-adjusting authorizations, you do not need to worry about any interruptions to your workday.

Meanwhile, is your next audit right around the corner? Once we show you your priority-one findings, you'll be able to relax as the big day approaches.

"Most companies are generally aware that a comprehensive security & compliance solution is necessary. However, a frightening number don't take action, despite ever-present threats."

Florian Wunder,
COO SAST SOLUTIONS

ARE YOU S/4HANA READY?

Most likely one of the biggest tasks currently facing all SAP managers is the necessary migration to S/4HANA, as support for SAP ERP will expire in the near future.

In our experience, we find that project kickoff is when many companies truly realize how many differences there are between SAP ERP and S/4HANA. Even more concerning is the fact that SAP security is often ignored completely during a migration.

For this reason, we are looking forward to advising you on the most important questions: Is a brownfield or greenfield approach the right one for the design of your new authorization concept? Do you transform your roles from the old system, or do you better rebuild your authorizations? You will benefit from our experience with successfully implemented migration projects and individual recommendations for action from the SAST experts.

And our SAP Security Consultants will be happy to help you identify and eliminate any security vulnerabilities on the SAP HANA application server, your operation system or the databases.

It's your choice – make or buy.

Your SAP is on pole position for us.

SAST MANAGED SERVICES

"You can't blame a company for lacking resources or, oftentimes, expertise. Nevertheless, the subject of SAP security and compliance continues to become increasingly difficult to keep up with."

Bodo Kahl, CEO SAST SOLUTIONS

THIS IS HOW WE SUPPORT YOUR PLATFORM SECURITY:

- Hardening your SAP system and monitoring critical system configurations
- Evaluating risks and cleaning up your ABAP code
- Ongoing health check and constant threat analyses
- Preventing critical system changes, transactions and reports, etc.
- Logging unwanted downloads from your systems

THIS IS HOW WE SUPPORT YOUR USER ACCESS MANAGEMENT:

- Continual authorization management
- Optimizing your user request and change workflows
- Preventing conflicts from segregation of duties
- Supporting role design with the help of template roles for the key SAP modules, completely SoD conflict-free

Your advantages:

HIGHEST POSSIBLE SECURITY

We exclusively employ security experts to agree a dependable service level with you.

ALWAYS UP-TO-DATE

Our security settings and attack databases are constantly being updated.

REAL-TIME MONITORING

We notify you promptly after identifying security risks, depending on the severity of the results.

STRENGTHENING YOUR RESOURCES

Our experts quickly take a load off your back and provide initial results in just a few days.

COST REDUCTION

Our support service already includes your SAST licenses.

NO CRYPTIC INCIDENT NOTIFICATIONS.

We provide contextual information and clear recommendations.

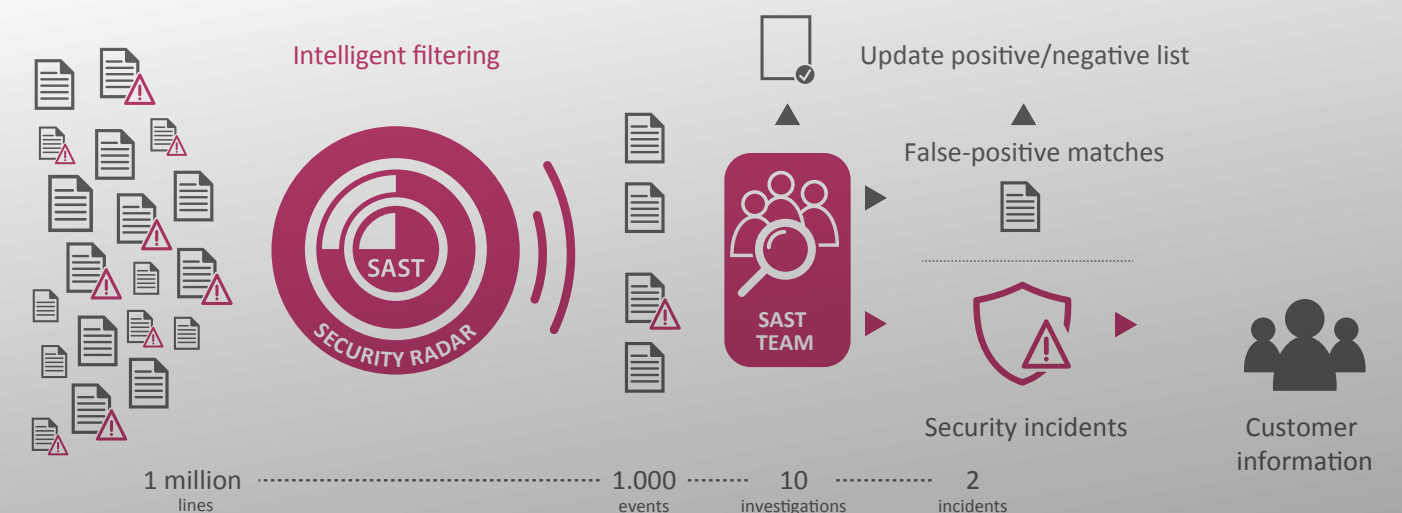

Checking for vulnerabilities, flawed configurations, and critical authorizations on a regular basis is the only reliable way to ensure SAP system security. Systematically securing SAP systems is, however, technically complex, time intensive and requires a high degree of personnel commitment. Most companies are far from being able to respond to issues in real time. Decision-makers thus face a fundamental question: Should they make or buy their way to SAP security and compliance?

YOU RUN YOUR BUSINESS. WE HANDLE THE SECURITY RISKS.

Digitalization projects are often top priority for companies. However, protecting IT systems from cyberattacks is frequently neglected because they are believed to be unlikely. In addition to the lack of free internal capacity, limited experience in the specialized field of SAP security often gets in the way of companies securing their SAP systems.

Our Managed Services provide you with a holistic SAP security and compliance solution – remotely or on location and for SAP ERP as well as for S/4HANA.

Your security is always on our radar.

Companies who've decided
to play it safe with us.

Linde
"The experience of AKQUINET's security experts supported us immeasurably in redesigning our risk management approach."

3,5^{over} MILLION SAP USERS 

Nordwest
"With the SAST SUITE, we have established a completely new basis for our authorization structures. In this way, we save time and money in the long term, and can be sure of legal compliance."

200 SATISFIED CUSTOMERS 

2000 PROTECTED SAP SYSTEMS

s.Oliver
"The SAST SUITE saves us around 20 work days for an audit. As a result, we boost our security and compliance, while minimizing time spent." 

Minol
"Our cooperation with AKQUINET is based on a strong partnership, and we particularly appreciate the fact that assistance with questions or issues is provided on very short notice." 

Baerlocher
"Our IT resources are limited, so both the solution scope and modular layout of the SAST SUITE are ideal for us." 

 3 times SAP-certified

What makes your SAP more secure? A strong team.

Based in Hamburg, Germany, AKQUINET employs a workforce of more than 900 people. Our company units are organized into owner-managed midsize enterprises, which means they are both flexible and highly efficient. As a self-financed IT business, we're also independent of manufacturers and banks.

AKQUINET is your strong and competent specialist SAP partner. We handle implementation and optimization down to real-time security solutions for SAP ERP and S/4HANA systems. In addition to our proprietary software suite, our SAST SOLUTIONS also offer consulting and managed services. This guarantees all-around threat protection for you. Our SAP security and compliance specialists draw on extensive expertise in project management – and naturally at an international level.

More than 200 customers worldwide now rely on our expertise to protect their SAP systems – and over 3.5 million SAP users – from hacker attacks, espionage and data theft.
